GRASS

SYNTHETIC GRASS SPECIALISTS
RESIDENTIAL - SPORTING - COMMERCIAL

THERE'S MORE TO A NEW SYNTHETIC GRASS BOWLING GREEN THAN THE QUOTED PRICE...

Even though price, installation & product choice for a new Synthetic Green is important, so too is good advice, maintenance & follow-up service. At Green Planet Grass we always endeavor to include all known costs in our initial quote, rather than springing unwelcome surprises on our clients. Possible areas of concerns are flagged as part of the discussion process.

We are committed to providing quality surfaces & professional installation, backed up by on-going advice & assistance to maximize the performance & longevity of your new green. We are currently working with our synthetic grass manufacturer, APT Asia Pacific, to produce a comprehensive, post-installation maintenance manual.

Green Planet Grass installed our sand filled synthetic C Green and have recently carried out re-screeding, coring and grooming maintenance work on our sand filled synthetic A & B greens.

We have found their workmanship, customer service and commitment to their product to be excellent.

We would recommend them to anyone contemplating installation of a sand filled synthetic bowling green.

- Leeming Bowls and Recreation Club

Green Planet Grass has also assisted numerous clubs in extending the playing life of their existing synthetic greens. Our comprehensive maintenance service includes:

- Roll Backs & re-screeding of uneven bases caused by dumping.
- On-site Perforating Machine to assist poor drainage issues.
- Grooming with specialized metal grooming reel.
- Assessing sand levels.
- Algae & moss treatments
